SELECTED CONSULTING EXPERIENCE:

Dôvera zdravotná poisťovňa, a.s.
September 2023 – Present

DEVOPS Consultant

Assumed ownership of the CI/CD and development platform after the responsible engineer departed, ensuring delivery continuity for approximately 50 developers while replacing a non-upgradable RKE1 environment.

Migrated GitLab, GitLab Runners, SonarQube and Nexus to an interim VM-based platform without interrupting development.

Designed VMware Tanzu Kubernetes Grid environments using ClusterAPI and ArgoCD; migrated the complete development workload and approximately 50% of staging and production workloads.

Built reusable GitLab CI/CD pipelines supporting approximately 250 .NET, ASP.NET, Node.js and React components across 50 repositories.

Integrated automated builds, unit tests, Trivy source and image scanning, blocking SonarQube quality gates, Kubernetes deployment and post-deployment health checks.

O2 Slovakia s.r.o.
May 2019 – Present

DEVOPS Engineer

Serve as the sole DevOps engineer supporting more than 40 developers, with technical ownership of CI/CD and non-production Kubernetes environments.

Re-engineered delivery from Jenkins and Groovy to reusable GitLab CI/CD components implemented with Bash and Python, scaling from approximately 70 to more than 150 repositories.

Reduced automated rebuild and deployment time for 150+ repositories by 70% - from 150 to 45 minutes - through pipeline refactoring, caching and parallel execution, without additional runner capacity.

Multitude IT Labs s.r.o.
January 2022 – April 2024

DevOps/SRE Engineer

Migrated repositories and CI/CD pipelines from Atlassian Bitbucket and Bamboo to GitHub and GitHub Actions. Supported application migration from on-premises Kubernetes to four AKS clusters covering development, test, production and shared platform services.

Developed reusable GitHub Actions and managed Azure infrastructure with Terraform; automated platform configuration with Ansible.

LANGUAGES:

English [fluent]
Slovak [native]

TECHNICAL SKILLS:

Cloud & platforms: Azure, Kubernetes, AKS, VMware Tanzu Kubernetes Grid, RKE1/RKE2, Cluster API, Linux, Windows Server

Infrastructure & GitOps: Terraform, Ansible, Helm, Argo CD, GitOps, HashiCorp Vault, networking, ingress, DNS, certificates, storage, secrets

CI/CD & development: GitLab CI/CD, GitHub Actions, Jenkins, Bamboo, Git, Bitbucket, Bash, PowerShell, Python, Java, Groovy

Containers & artifacts: Docker, Podman, Harbor, Nexus Repository

Security & quality: DevSecOps, Trivy, SonarQube, SAST, dependency and container scanning, quality gates

Observability: Prometheus, Grafana, Elastic Stack, Zabbix

Build & data: Maven, Gradle, npm, NuGet, Oracle SQL and PL/SQL

EARLIER EXPERIENCE:

Deutsche Telekom Pan-Net, s.r.o.
October 2018 – April 2019

Full-stack Developer

Developed a portal for managing secure cloud services on OpenStack for companies owned by Deutsche Telekom Group

Slovenská sporiteľňa, a.s.
May 2016 – September 2018

IT Technical Lead

Led the onboarding of development teams onto centralized GitLab and Nexus platforms, replacing fragmented source-control and artifact-management practices.

Championed the bank's adoption of DevOps by establishing its first standardized CI/CD pipelines and aligning development and operations teams around shared delivery processes.

T-Systems Slovakia s.r.o.
January 2013 – December 2014

IT Application Specialist

Operated highly available, business-critical applications for Shell, including a global SAP-integrated tax-calculation platform and a password-management service covering tens of thousands of servers.

EDUCATION:

2011 – 2013

Technical University of Košice
Industrial Engineering and Management
Master's degree

2008 – 2011

Technical University of Košice
Informatics
Bachelor's degree
